RC Drilling to commence in Burkina Faso

**Golden Rim Resources Ltd** (ASX: GMR, **Golden Rim**) today announced that Boart Longyear Burkina SARL had been secured to complete 10,000m of reverse circulation (RC) drilling on the Balogo and Yako projects in Burkina Faso, West Africa (Figure 1). The drilling is scheduled to commence next month.

Golden Rim is pleased to have secured Boart Longyear who are world leaders in integrated mineral exploration drilling services, with 120 years of history and US$1.5 billion in annual revenue.

The 10,000m of RC drilling will be split between the Balogo (8,000m) and Yako (2,000m) projects. Generally holes will be inclined, with a maximum hole depth of 120m. Progress is expected to be rapid with drilling being conducted 24 hours a day in two shifts.

The drilling at Balogo will comprise a series of parallel fences of holes and is designed to test the high grade gold and copper mineralisation exposed in artisanal workings and the major co-incident gold-in-soil anomaly which currently extends for over 3km (Figure 2).

The drilling at Yako will be conducted in the Zanna Permit and is designed to follow-up highly significant gold mineralisation that was intersected by a previous explorer. The previous intercepts in aircore drilling included: 11m @ 8.7 g/t gold, 16m @ 1.4 g/t gold and 10m @ 1.6 g/t gold (Figure 3). The aircore holes were stopped by the watertable. The RC drill holes planned by Golden Rim will be able to test below the watertable and will determine the full extent of this mineralisation.

Drilling is planned to start at the Balogo Project and once this portion of the program has been completed the rig will be relocated to the Yako Project.

About Golden Rim Resources Limited

**Golden Rim Resources Ltd** (ASX: GMR) is an exploration and mining company with a focus on copper and gold. The Company is active in West Africa, with gold resources and licences covering over 3,300km² in the highly prospective Birimian greenstone belts of Mali and Burkina Faso.

With experienced management and extensive local teams in the Company’s permanent offices in Mali and Burkina Faso, Golden Rim is able to move quickly and efficiently in order to maximise potential opportunities.

Abu Dhabi-based Royal Group is a substantial shareholder and strategic partner of Golden Rim. Through an alliance company, Royal Falcon Mining LLC, the companies have secured advanced copper/gold projects (Falun and Bersbo) in Sweden and are seeking further significant investments.

Golden Rim is pursuing an active program of drilling in Mali, Burkina Faso and Sweden and is poised to deliver significant growth and value to shareholders.

The information in this report that relates to exploration results and mineral resources is based on information compiled by Mr Craig Mackay who is a member of The Australasian Institute of Mining and Metallurgy. Mr Mackay is a consultant of Golden Rim Resources Ltd through Earth Science Solutions Pty Ltd. Mr Mackay has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Mackay consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
